SUSPENDED CEILING

Define areas in lobbies, open work spaces, loft style apartments and offices, residential or corporate building common areas to create privacy without blocking views, light or air with architectural screen walls.

CONSTRUCTOR PARTITION SYSTEM features hardware and supports hidden between two layers of panels. Supports are attached to floor and ceiling, creating a rigid and structural partition system. All materials, supports and hardware are customized for interior or exterior application.

Standard supports include, 2"x1" frame, 1"x1" frame, cable suspension, and standoffs. All systems are engineered to meet desired finished dimensions.

Integrated LED lighting housing is an option for most systems.

Our modern CNC screen design patterns can be scaled, modified, and graduated. Custom patterns can also be developed specific to your project.

Standard materials finish at 46" x 94", some materials options finish at 58" x 118". For larger sizes, seamless continuous patterns can be created depending on the pattern and supports.

CLOUD CEILINGS

SUSPENDED CEILINGS WITH FRAME

SUSPENDED CLOUD CEILING SCREENS WITH FRAME

Single layer or double layer modular floating cloud ceiling screens hung in rows or multiple levels create atmosphere and accentuate focal areas in open spaces. Lowering sight lines help define strategic areas to create intimate atmosphere and elevate the design beyond the ground level.

Free shape ceiling pods in various patterns and colors will add an artistic and sculptural accent to any environment.

Strategically placed ceiling screens can be especially effective in distracting the eye from open exposed ceilings structures. LED lighting can be incorporated into most ceiling cloud systems to create stunning effects of texture, shadow and depth.

CATEGORY 1: **STANDARD CEILINGS:** Single layer 1/8" Aluminum composite panels, 2" aluminum frame, frame covers to match.

CATEGORY 2: **FREE SHAPED CEILINGS:** Double layer 1/8" Aluminum composite panels, double panel connectors, support structure.

SIZES: Standard single section up to 46"W x 94"H x 2.125"D.
White, black and brushed silver 46"W x 118"H x 2.125"D.
Larger sizes are split and seamed.

ADDITIONAL
INFO:

Aluminum composite panels are factory finished with gloss or matte or anodized finishes.

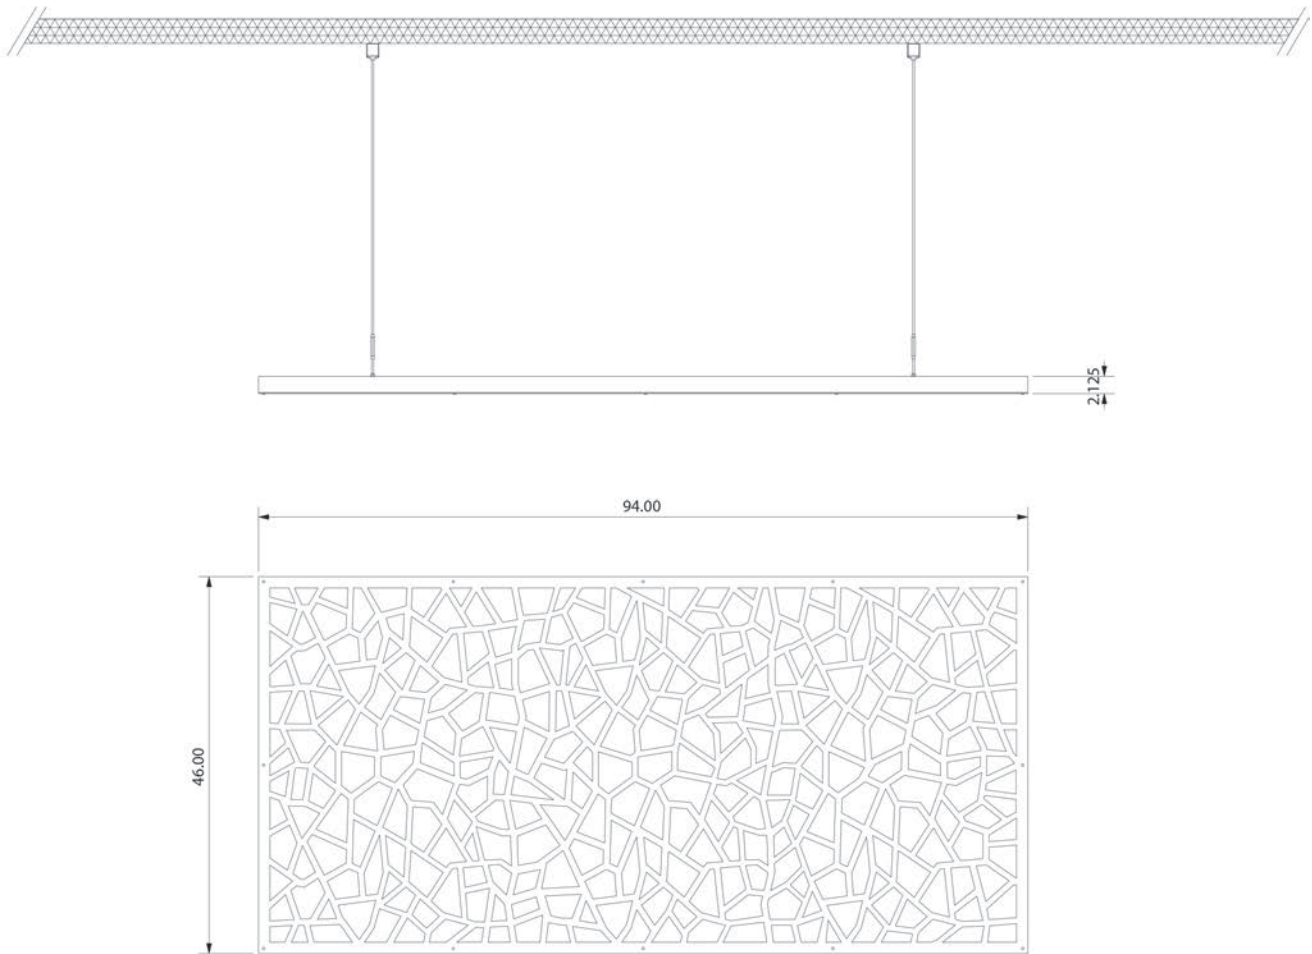

COMPONENTS:

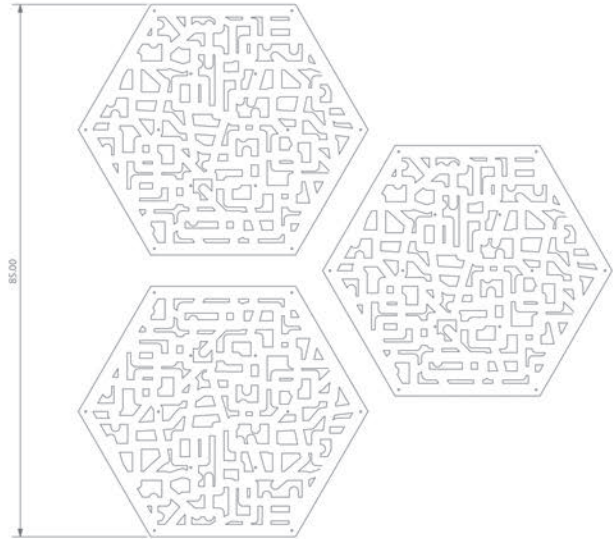

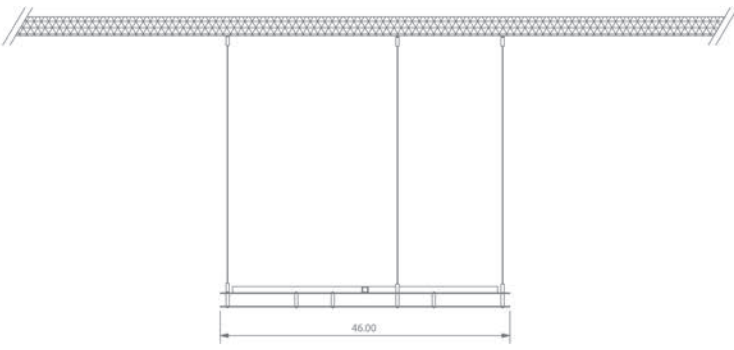

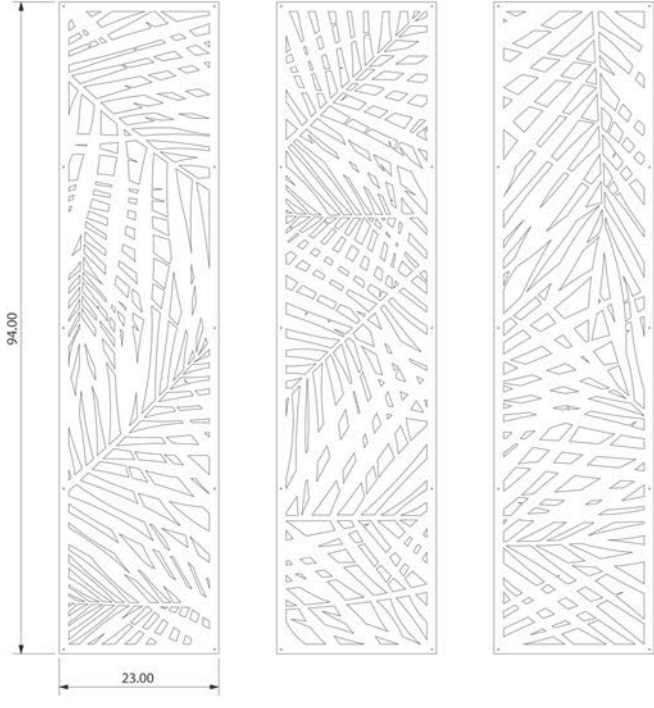

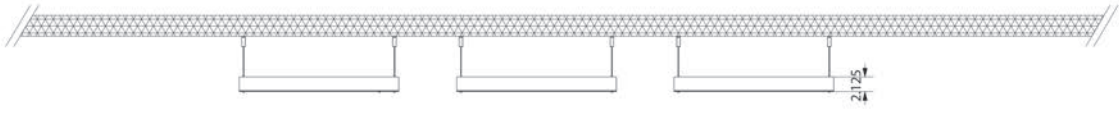

CNC cut aluminum composite panels, 2" profile aluminum frames or double panel connectors, support structure for irregular shapes, aircraft cables or threaded rod hangers with adjustable turnbuckles.

All supports and hardware powder coat finished to match. all hardware necessary for installation included.

INSTALLATION:

Shipped as assembled units. For continuous ceilings, frames are bolted side to side. All hardware included.

DECORATIVE CEILING

DIRECTLY ATTACHED & RECESSED CEILINGS

DECORATIVE CEILING SCREENS

Single layer or double layer decorative ceiling screens are attached directly to finished ceiling or recessed to specified locations. Ideal for pathways and smaller spaces such as foyers, elevator lobbies, and long hallways.

Modular sections in single or continuous lengths will create distinct walk paths, direct flow and visually define space. Rectangular or Square screen sections with 2" aluminum frames are low profile and seamlessly introduce artistic details to otherwise forgotten areas. Strategically placed screens can emphasize specific locations while minimizing others.

LED lighting can be incorporated into most ceiling systems to create stunning effects of texture, shadow and depth.

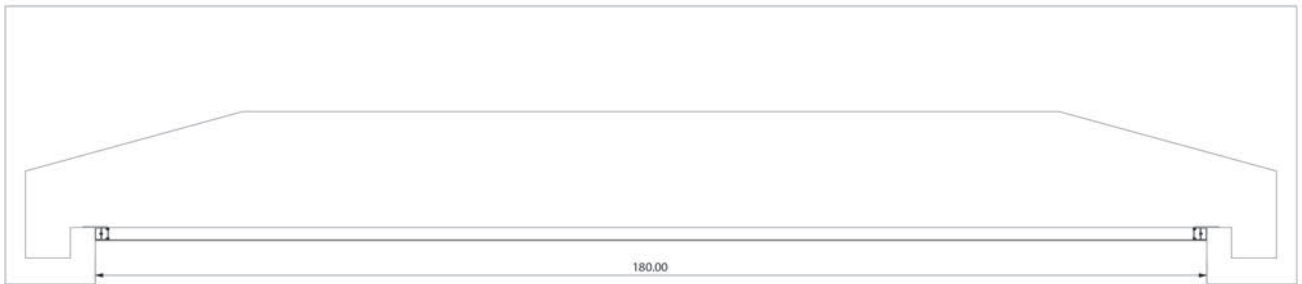

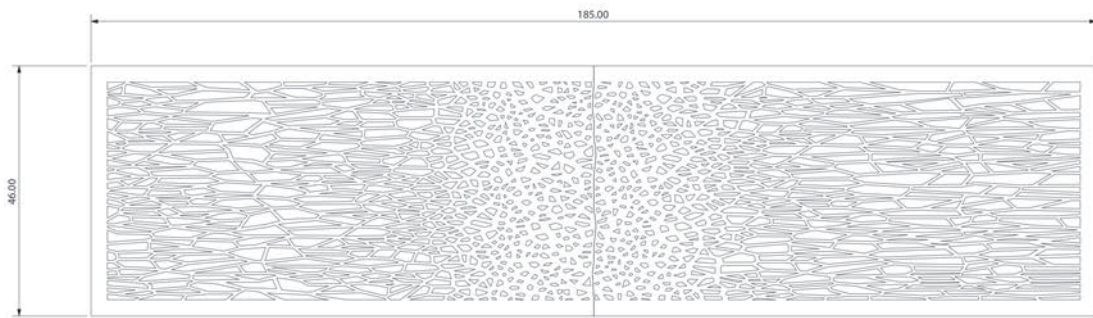

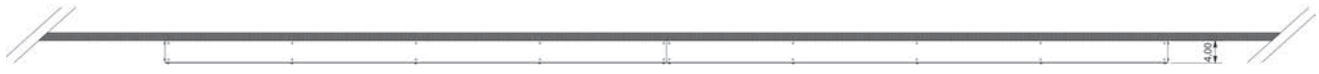

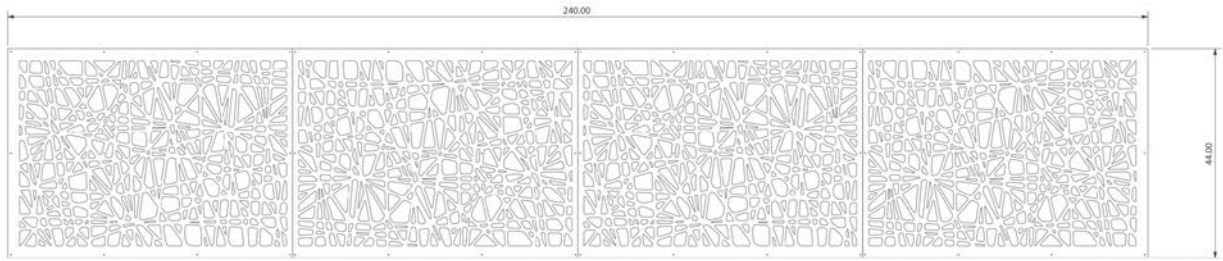

MATERIAL : 1/8" Aluminum composite panels, 2" x 1" aluminum supports, modular frame structures, rods, spacers or brackets.

SIZES: Standard single panel up to 46"W x 94"H
White, black and brushed silver panels 46"W x 118"H
Ceilings are modular and can be any size.

COLOR: Standard colors are white gloss, white matte, black matte, black gloss, almond matte, statuary bronze matte
blue matte, blue gloss, red matte, red gloss, yellow matte, green matte, green gloss

ADDITIONAL COLORS: Anodized brushed metallic finishes. Silver/ silver, bronze/ gold, black/ copper

INSTALLATION: Ceiling frames and supports are shipped in sections including installation templates and all required hardware. We provide extensive instruction material including on site support if needed.

CUSTOM CEILINGS

CONTINUOUS ILLUMINATED CEILINGS

CUSTOM CEILING SCREENS

Single layer or double layer customizable ceiling screens for large scale applications. Panels are split and seamed to create a continuous pattern.

All patterns can be scaled, modified and graduated to add movement and flow through the space. Custom ceiling screens will add three dimensional and distinctive style to enhance your designed space with sculptural, artistic and visually stunning results.

Perfectly suited for large entry lobbies, restaurants, and conference rooms, continue down a feature wall or 2 walls to create an archway for a dramatic entrance.

LED lighting can be incorporated into most ceiling systems to create stunning effects of texture, shadow and depth.

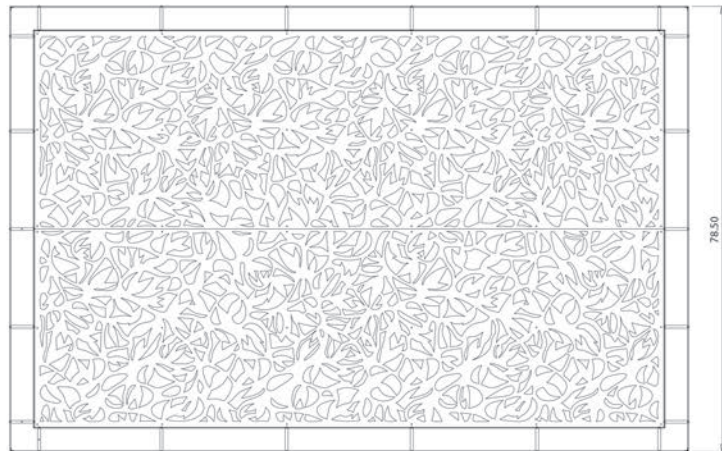

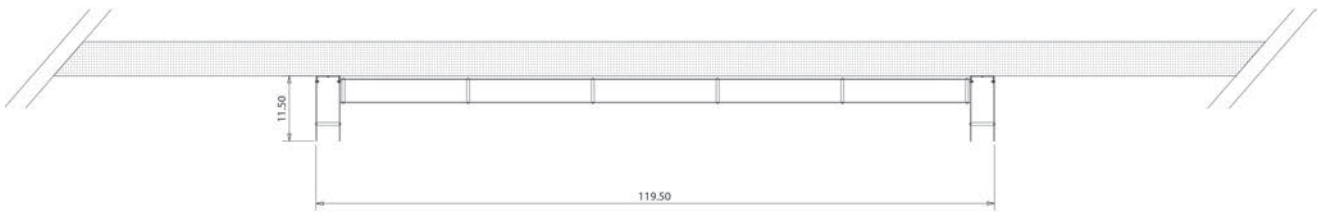

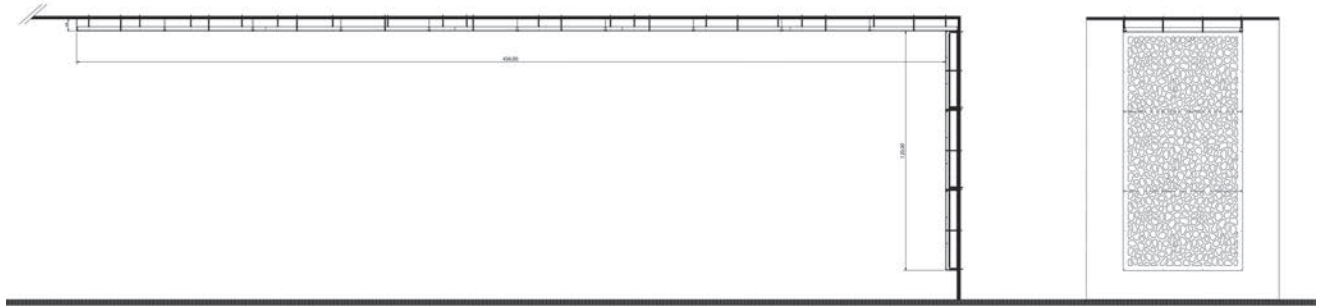

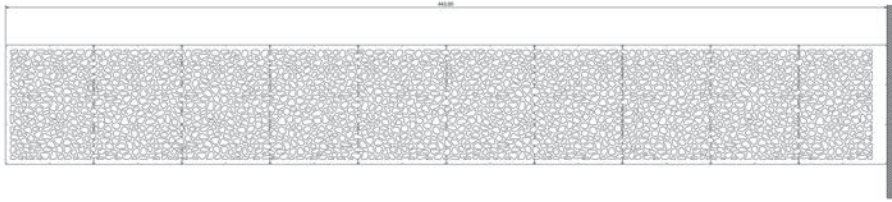

MATERIAL : 1/8" Aluminum composite panels, 2" x 1" aluminum supports, modular frame structures, rods, spacers or brackets.

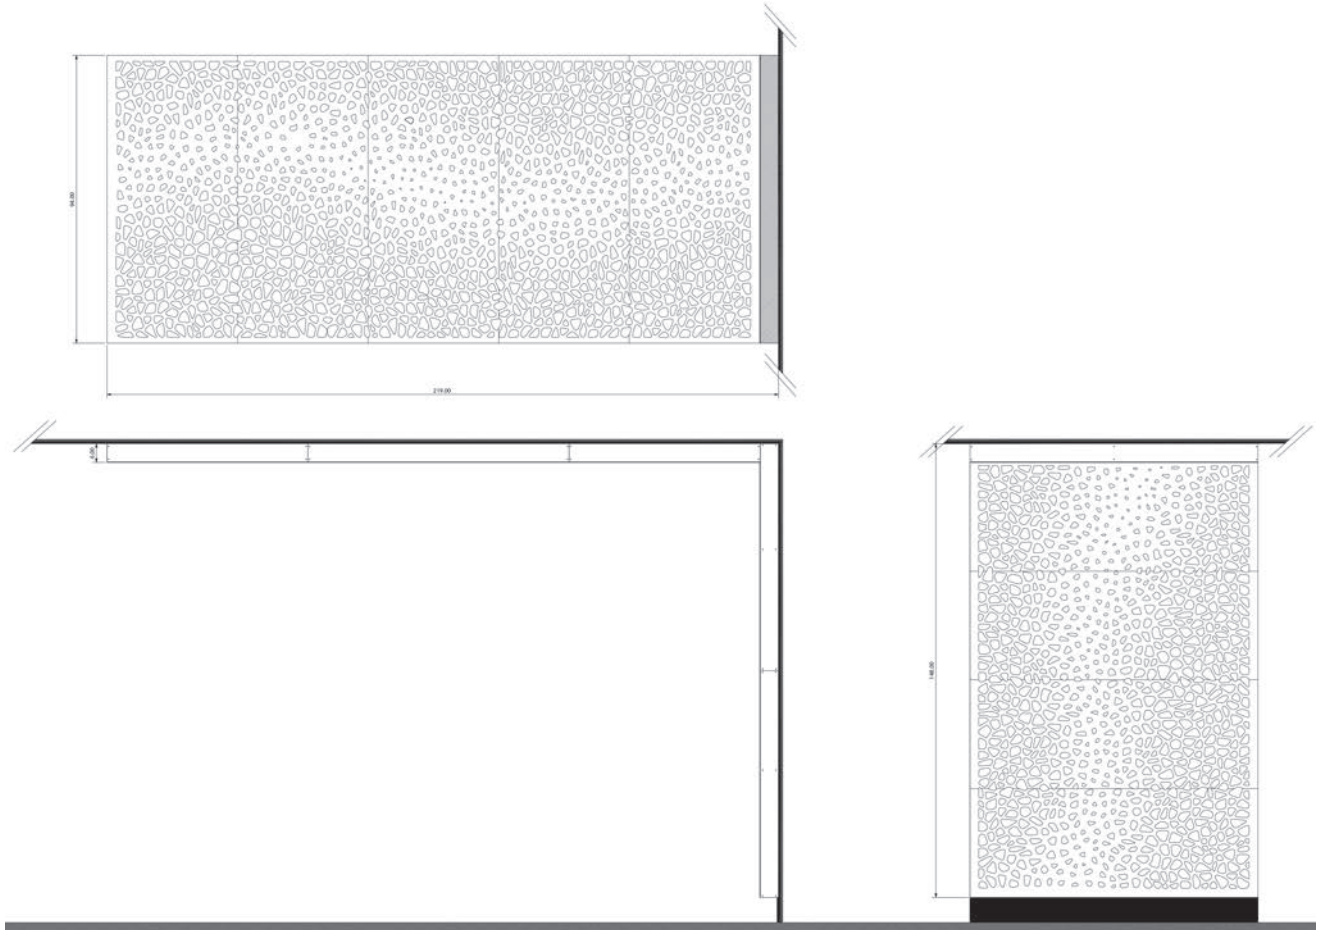

SIZES: Standard single panel up to 46"W x 94"H
White, black and brushed silver panels 46"W x 118"H
Ceilings are modular and can be any size.

COLOR: Standard colors are white gloss, white matte, black matte, black gloss, almond matte, statuary bronze matte, blue matte, blue gloss, red matte, red gloss, yellow matte, green matte, green gloss

ADDITIONAL COLORS: Anodized brushed metallic finishes. Silver/ silver, bronze/ gold

INSTALLATION: Ceiling frames and supports are shipped in sections including installation templates and all required hardware. We provide extensive instruction material including on site support if needed.
